Michael Lozano, Jr., M.D., HCFR Medical Director

1. Basic BLS treatments
2. Maintain the patient's airway and assure that they do not injure themselves or someone else.
3. Administer high flow **oxygen**, if the patient will tolerate, until their GCS returns to normal.
4. ALS evaluation/transport criteria:
  - a. First time seizure
  - b. GCS <15 (or patient's norm) ten minutes after seizure activity ends
  - c. History of head trauma within the last two (2) weeks
  - d. Any seizure lasting >five (5) minutes (status epilepticus)
  - e. Multiple seizures
