Michael Lozano, Jr., M.D., HCFR Medical Director

1. Basic ALS Treatments
2. **Oxygen** and airway control
3. IV Normal Saline (large bore)
4. **Pre-Eclampsia**
 - a. If delivery is not imminent, transport the mother on her left side.
 - b. Keep the patient clam, and if possible, keep the lighting in the patient compartment low.
 - c. Minimize noise and other external factors that may increase the patient's anxiety level.
5. **Eclamptic Seizures**
 - a. **Magnesium Sulfate:**
 - i. Loading Dose: 5.0 grams IV infused over 10 – 15 minutes.
 - ii. Maintenance Drip: 1.0 – 2.0 grams/hr.
 - b. If no response, follow **HCFR SEIZURES** protocol.
