Michael Lozano, Jr., M.D., HCFR Medical Director

1. Basic ALS Treatments.
2. Refer to **HCFR SPINAL MOTION RESTRICTION** protocol and apply as indicated.
3. Splint as appropriate.
4. For severe pain, follow **HCFR PAIN MANAGEMENT** protocol.
 - a. Long bone fractures and multiple fractures will be transported and treated with the pain management protocol unless the patient refuses pain management and signs informed refusal.
5. ALS evaluation and transport criteria:
 - a. Any patient who has received analgesia.
 - b. Any patient with compromised circulation in the affected limb.
 - c. Any patient with long bone fractures or dislocations that cannot be stabilized without analgesia.
